From April 10th to 13th, 2018, on the fairgrounds of Messe München, the analytica, International Leading Trade Fair for Laboratory Technology, Analytics and Biotechnology, will take place for the 26th time. It will be accompanied from April 10th to 12th by the analytica conference, during which scientists report on application-related issues from analytics. One of the main topics of this year’s conference is Big Data. The scientific programme of the analytica conference is organised by Forum Analytik, consisting of the Association of German Chemists (Gesellschaft Deutscher Chemiker, GDCh), the Society for Biochemistry and Molecular Biology (Gesellschaft für Biochemie und Molekularbiologie, GBM) and the German Society for Clinical Chemistry and Laboratory Medicine (Deutsche Gesellschaft für Klinische Chemie und Laboratoriumsmedizin, DGKL).

Analytical chemistry is one of the most multi-faceted fields of chemistry. It links numerous sub-disciplines and is an interface to socially relevant topics. Many Nobel prizes have been awarded for analytical developments, and technology leaps, too, are always based on insights from sophisticated analytics. At the analytica conference, experts from all over the world will show what the currently hot topics in the discipline are.

One focus of the conference is on Big Data. After all, digitisation has long since taken hold in the analytical laboratories. But how can you efficiently process huge amounts of analytical data? And which “smart” solutions are there to optimise existing processes? The lectures of the sessions will give a condensed overview of novel methods, procedures, techniques and their specific application

possibilities. Other sessions will address the use of analytical methods in food chemistry, in the detection of microplastics, and in toxicology.

The analytica conference will take place at the ICM – International Congress Center Munich, on the fairgrounds. Admission is free for visitors of analytica. The joint booth of Forum Analytik will be located in Hall B2.504.

About analytica

analytica is the international trade fair for laboratory technology, analysis and biotechnology and their users in research and industry. The trade fair is accompanied by the analytica conference, where the international scientific elite meets to discuss the latest topics that pertain to chemistry, biochemistry and laboratory medicine. A total of 35,002 visitors and 1,244 exhibitors took part in analytica in 2016. analytica has been held in Munich every two years since 1968. The next analytica takes place from April 10 to 13, 2018.

analytica worldwide

Messe München is the world's leading trade fair organizer for laboratory technology, analysis and biotechnology: Part of the analytica network are also the trade fairs analytica China, analytica Anacon India and India Lab Expo, analytica Vietnam and analytica Lab Africa.

Messe München

Messe München is one of the leading exhibition organizers worldwide with more than 50 of its own trade shows for capital goods, consumer goods and new technologies. Every year, a total of over 50,000 exhibitors and around three million visitors take part in more

than 200 events at the exhibition centre in Munich, at the ICM – Internationales Congress Center München and the MOC Veranstaltungszentrum München as well as abroad. Together with its subsidiary companies, Messe München organizes trade shows in China, India, Brazil, Russia, Turkey, South Africa, Nigeria, Vietnam and Iran. With a network of associated companies in Europe, Asia, Africa and South America as well as around 70 representations abroad for over 100 countries, Messe München has a global presence.
