Portfolio offer

Every four years, INTERFORST is the investment and innovation platform of the forestry and woodland industry. On an area of around 75,000 square meters, it provides a comprehensive overview of state-of-the-art technologies and services for the forestry and wood cluster. The range of topics extends from afforestation and forest care to timber harvesting, timber processing and wood energy, through to transport vehicles, safety at work and information technology in the forest.

Target audience

On the five days of the fair, around 50,000 visitors from over 70 countries are expected. The visitors come from all sectors of the forestry and forestry industry as well as the timber and sawmill industry. Nearly one from five visitors comes from abroad.

Supporting program at a glance

The comprehensive INTERFORST supporting program, consisting of special shows, forums, the scientific congress and numerous machine demonstrations,

Presseinformation | July 12, 2018 | 3/3

will be practically oriented and forward-looking. It traditionally brings together science, politics and practice (see the PI “Highlights from the supporting program”).
