- **Experience Laboratory 4.0 live in the Digital Transformation special show**
- **analytica conference and forums: First-hand trends and tips**
- **COVID expert sessions and Finance Days with a themed day on personalized medicine**

Live in Munich again at last: When analytica, the world's leading trade fair for laboratory technology, analysis and biotechnology, opens its doors from June 21 to 24, around 900 exhibitors will present their innovations. The industry is particularly looking forward to in-person dialog. There are ample opportunities for this at the trade fair stands, as well as at the analytica conference, in the forums and during the many other accompanying events. "Nothing beats a real get-together," says Armin Wittmann, Exhibition Director for analytica. "The attractive analytica supporting program brings the laboratory of tomorrow to life and facilitates the exchange of know-how, experience and ideas."

analytica conference: Science meets industry

The analytica conference, the scientific high point of analytica, will take place on the first three days of the trade fair in the ICM, right next to the exhibition halls. Whether it's nanoplastics, cancer diagnosis or antibiotic-resistant germs in the water cycle: In nearly 200 presentations and a poster show, renowned scientists from all over the world will discuss what modern analytics is capable of today, where its limits currently lie and how these can be overcome in future. The multifaceted program was put together by the German Chemical Society (Gesellschaft Deutscher Chemiker, GDCh), the German Biochemistry and

Molecular Biology Society (Gesellschaft für Biochemie und Molekularbiologie, GBM) and the German Society for Clinical Chemistry and Laboratory Medicine e.V. (Deutsche Vereinte Gesellschaft für Klinische Chemie und Laboratoriumsmedizin, DGKL).

Special show and Digital Transformation forum: Laboratory 4.0 in action

The megatrend of digitalization will be a common thread through the analytica conference program, as well as through the exhibition halls. In the Digital Transformation special show in Hall B2, visitors can experience automated workflows, networked devices and robots in action. In the neighboring forum of the same name, Agilent, Merck, Mettler Toledo, Thermo Fisher Scientific and many other companies will explain their concepts for Laboratory 4.0 in 30-minute presentations. The industry association SPECTARIS will provide an overview of the current status of a uniform OPC-UA interface for German manufacturers.

analytica forums: COVID-19 expert rounds, Finance Days and more

The Biotech forum (Hall A3), the Occupational Health and Safety forum and the analytica forum (both in Hall B1) likewise invite visitors to practical presentations and podium discussions. Among the highlights in the analytica forum are the expert rounds on COVID-19 research on June 22 and 23, with the likes of Professor Jonas Schmidt-Chanasit from the Bernhard Nocht Institute for Tropical Medicine in Hamburg and Professor Helga Rübsamen-Schaeff, Leopoldina member and founder and Supervisory Board member of the biopharmaceutical company AiCuris. The exact dates will be announced shortly on the analytica website.

The German biotech industry has emerged as a solution to problems during the pandemic and has collected more capital in the past two years than ever before. The Finance Days on June 23 and 24 at the Biotech forum in Hall A3 will cover financing trends in the life sciences sector and answer questions about initial public offerings and global markets. With the personalized medicine themed day on June 24, analytica is also putting a particular focus on this promising sector.

Press Release | June 7, 2022 | 3/4

Representatives from associations, clusters and companies in the health care sector will discuss the potential of individualized therapies from various perspectives.

Occupational Health and Safety

Safety in the laboratory is the number one priority in day-to-day work. The Occupational Health and Safety forum in Hall B2 will be devoted to this topic. This year at analytica, the company asecos will once again demonstrate accidents that can happen if hazardous substances are stored incorrectly in the laboratory live in their daily experimental presentations. There will also be presentations on lithium-ion batteries that are increasingly finding their way into laboratories and whose potential dangers should they be mishandled are often underestimated. The program is rounded out by presentations from companies such as Erlab, Bernd Kraft and a1-environsciences.

Also: Further training and student information day

Anyone who wants to use analytica as a career booster can combine a trade fair visit with further training. The training and consulting firm Dr. Klinkner & Partner will be offering all-day seminars at analytica on selected topics, from laboratory IT to the validation of analytical methods. And last but not least analytica, together with the scientific society GDCh and the VBio, will be supporting young talent in the industry. As usual, the popular student information day will take place on the last day of the trade fair on June 24. Here, high-school graduates can learn about fields of study and occupational areas in chemistry, biotechnology and food chemistry.

Three trade fairs, one ticket

ceramitec, the leading trade fair for the ceramics industry, and automatica, the leading trade fair for intelligent automation and robotics, will take place alongside analytica on the exhibition grounds of Messe München. Access to both trade fairs is free to analytica visitors.

About analytica

analytica is the world's leading trade fair for the laboratory technology, analysis and biotechnology industries and their users in research and business. The trade fair will be complemented by the analytica conference, where the international scientific elite meet for discussion of current topics in chemistry, biochemistry and laboratory medicine. At the analytica 2018, there were 35,626 visitors and 1,168 exhibitors. Since 1968, analytica has been held biannually in Munich. After being held very successfully in a digital-only format in 2020, the next live event will run from June 21–24, 2022.

analytica worldwide

Messe München is the world's leading trade fair organizer for laboratory technology, analysis and biotechnology: The analytica network comprises – in addition to the world's leading trade fair analytica – analytica China, analytica Anacon India with India Lab Expo and analytica Vietnam.

About Messe München

Messe München is one of the leading exhibition organizers worldwide with more than 50 of its own trade shows for capital goods, consumer goods and new technologies. Every year, a total of over 50,000 exhibitors and around three million visitors take part in more than 200 events at the exhibition center in Munich, at the ICM – Internationales Congress Center München, the Conference Center Nord and the MOC Veranstaltungszentrum München as well as abroad. Together with its subsidiary companies, Messe München organizes trade shows in China, India, Brazil, South Africa and Turkey. With a network of associated companies in Europe, Asia, Africa and South America as well as around 70 representations abroad for over 100 countries, Messe München has a global presence.
